

Post-VR Experiment Questionnaire

	Gilt überhaupt nicht	Gilt nicht	trifft eher nicht zu	Weder noch	trifft eher zu	Gilt	trifft völlig zu
1) I had a feeling of general discomfort at the end of the VR task.							
2) I felt dizzy at the end of the VR task.							
3) I felt difficulty in focusing (visual) during the VR task.							
4) I have headache after the VR task.							
5) During the experiment there were moments in which I felt as if the virtual hands were my own hands.							
6) I had lost the sense of time because I was very concentrated in accomplishing the task .							
7) It was difficult to remember the location of the red ball.							
8) I had the feeling that the haptic feedback I received has improved my performance.							
9) I had the feeling that the datagloves felt unnatural to wear.							
10) I had the feeling the experiment distanced me from my own body.							
11) I did not recognize the haptic feedback because I was concentrated on the task.							
12) I was confused when the haptic feedback was incongruent.							
13) The haptic feedback I felt did not influence my performance.							
14) It was easy to remember the location of the red ball.							
15) It felt like the hands I looked at were not my own hands.							
16) I felt in control of my movement.							
17) The ball I was holding felt more natural when there was haptic feedback.							
18) I had the feeling that my performance decreased when there was no haptic feedback.							
19) I had the feeling that the experiment brought me closer my own body.							

	Gilt überhaupt nicht	Gilt nicht	trifft eher nicht zu	Weder noch	trifft eher zu	Gilt	trifft völlig zu
20) It felt natural when I moved my hands towards the template.							
21) I felt my movement was faster when the haptic feedback was given.							
22) I felt as if I chose the right target to place the red ball when the haptic feedback was given.							
23) I did not feel any difference in my performance when there was no haptic feedback.							
24) It was difficult to remember the location of the red ball when the haptic feedback was incongruent.							
25) I felt the task was boring at times.							
26) I felt as though I was really in the virtual apartment during the experiment.							
27) I felt as though I was really in the lab during the experiment.							
28) I behaved as if I was in an actual apartment, and not a virtual one.							
29) The virtual apartment did not feel realistic.							
30) I was frustrated by the game at times.							
31) The task was fun at times.							

Im Folgenden geht es um Deine Erfahrung in der “TSVR Experiment”. Bitte gebe an, wie sehr die folgenden Aussagen auf Dich zutreffen oder nicht zutreffen. Kreuze bitte diejenige Antwort an, die am besten auf Deine Erfahrung zutrifft.

Name:_____ Datum:_____

Cybersickness Questionnaire (Pre)					
	Überhaupt nicht	Ein bisschen	Neutral	Viel	Vollständig
Generelles Unbehagen					
Ermüden					
Langeweile					
Schläfrigkeit					
Kopfschmerzen					
Überanstrengung der Augen					
Schwierigkeiten beim Fokussieren					
Erhöhter Speichelfluss					
Verminderter Speichelfluss					
Schwitzen					
Ubelkeit					
Konzentrations-schwierigkeiten					
Depression					
Verschwommene Sicht					
Schwindel					
Schwäche					
Verminderter Appetit					
Verwechslung
